ADVANCING HEALTH THROUGH TRANSPORTATION PLANNING
AN INTRODUCTION TO THE INTEGRATED TRANSPORT AND
HEALTH IMPACT MODELING TOOL

Monday, June 20, 2016 / 12:00 – 2:00pm**
Sacramento Council of Governments (SACOG) Boardroom - 1415 L Street #300, Sacramento, CA

Lunch and registration start at 11:30am.

AGENDA:

12:00pm  Welcome
Laura Podolsky – Policy Director, National Center for Sustainable Transportation

12:05pm  ITHIM: Bringing Health Data to Transportation Planning
Speakers will discuss ITHIM’s history and purpose, including when and why it was
developed, how it has evolved, and how and where it is being used today; and provide a
high level introduction to how the model works, including its strengths, weaknesses, and
limitations, data inputs and outputs, and how it fits into the greater family of models being
used.

- James Woodcock – Senior Research Associate, Centre for Diet and Activity Research,
  University of Cambridge School of Clinical Medicine
- Neil Maizlish – Senior Research Scientist, Center for Climate Change and Health, Public
  Health Institute

12:30pm  Panel: Real World Application of ITHIM and Future Directions
Panelists will discuss their use of ITHIM to inform policy, outcomes and successes, lessons
learned, and future opportunities and directions the model could take to make it more
valuable to decision makers, community stakeholders, and planners.
Moderator: Caroline Rodier, Associate Director, Urban Land Use and Transportation Center,
Institute of Transportation Studies, UC Davis
Panelists:
- Seth Scott – GIS Specialist, Fresno Council of Governments
- Vikrant Sood – Senior Planner, Metropolitan Transportation Commission
- Lisa Zorn – Senior Planner, Metropolitan Transportation Commission
- Alex Karner – Assistant Professor, Georgia Institute of Technology

1:55pm  Closing Remarks
Laura Podolsky – Policy Director, National Center for Sustainable Transportation

2:00pm  Adjourn

**Turn Over to View the Bonus Technical Session Agenda
BONUS TECHNICAL SESSION

The purpose of the bonus technical session is to provide participants an under the hood look at how ITHIM works and to have additional discussion with speakers and panelists. The bonus technical session is meant to be interactive and conversational. Participants are encouraged to ask questions of either the speakers or any of the panelists. The session will begin with a quick check-in on specific areas of interest from the audience.

AGENDA:

2:15pm  Regroup / Check-In
Laura Podolsky – Policy Director, National Center for Sustainable Transportation

2:25pm  Under the Hood Look at ITHIM
Speakers will provide an in-depth and more technical presentation on how ITHIM works, data inputs and outputs, how it interfaces with other models, and future directions and improvements of the tool.
- James Woodcock – Senior Research Associate, Centre for Diet and Activity Research, University of Cambridge School of Clinical Medicine
- Neil Maizlish – Senior Research Scientist, Center for Climate Change and Health, Public Health Institute

3:25pm  Group Discussion on Future Directions and Development for ITHIM
This is meant to be a free form discussion with speakers, panelists, and participants on any aspect of ITHIM that is of interest with an emphasis on identifying future directions and development for ITHIM based on the needs and interest of decision makers, community stakeholders, and planners.
Moderator: Laura Podolsky – Policy Director, National Center for Sustainable Transportation

3:55pm  Closing Comments
Laura Podolsky – Policy Director, National Center for Sustainable Transportation

4:00pm  Adjourn
